EDUCATION

Universiti Malaya
Master in Data Science

Kuala Lumpur, Malaysia
March. 2026 – April 2027

Noida Institute of Engineering and Technology
Bachelor of Technology - Information Technology

Greater Noida, Uttar Pradesh, India
Aug. 2018 – June 2022

EXPERIENCE

Software Developer

July 2025 – Feb 2026

Pitch Our Way

Delhi, India

- Developed and optimised web application modules using Java, Spring Boot, Angular, REST APIs, and MySQL, improving system efficiency by fifteen per cent.
- Built backend APIs and business logic in Spring Boot while integrating them with responsive Angular-based front-end components.
- Debugged and resolved application issues related to API failures, database errors, missing data, and transaction handling within agreed timelines.

Software Engineer

December 2023 – June 2025

LTIMindtree

Noida, India

- Increased system efficiency by fifteen percent through the optimization of IBM Mainframe applications using Job Control Language JCL.
- Monitored job execution and resolved job failure, ensuring recovery within 7 hours by performing data modifications to fix issues such as deadlocks, data alignment problems, and missing data.
- Successfully resolved a hundred percent of high, medium, and low-priority incidents within the defined timeframe.

Java Developer

Sep. 2023 – Dec. 2023

LTIMindtree

Bhubaneswar, India

- Proficient in Core Java, JDBC, SQL, Spring Boot, and Angular, with hands-on experience in implementing data structures and building a web-based job portal using full-stack technologies.
- Completed 3 major milestones in the Ignite Program and contributed to a group project by designing and developing core features of a job portal, showcasing strong problem-solving and collaboration skills.

Programmer Analyst

Jan 2022 – July 2023

Cognizant

Bangalore, India

- Worked on Azure DevOps.

PROJECTS

Hospital Length of Stay Prediction | *Python, scikit-learn, XGBoost, Streamlit, Hugging Face* | [Live Demo](#)

2026

- Built a regression pipeline on New York SPARCS 2021 inpatient data (around 2.1 million records) to predict patient length of stay using Linear Regression, Random Forest, and XGBoost.
- Achieved the best result with XGBoost (R^2 of 0.56) after feature engineering on diagnosis, severity, and admission attributes.
- Deployed an interactive Streamlit application for live predictions, with the trained model hosted on Hugging Face Hub.

Financial Complaint Classification (NLP) | *Python, PyTorch, Transformers, DistilBERT, Streamlit* | [Live Demo](#)

2026

- Fine-tuned DistilBERT on CFPB consumer financial complaint data, reaching 85.6% accuracy and a macro-F1 of 0.73 across complaint categories.
- Deployed the model on Streamlit Cloud with weights hosted on Hugging Face Hub, including an accountability dashboard that scores financial institutions by complaint risk.
- Handled text preprocessing, tokenization, and model evaluation for a multi-class classification task supporting SDG 16.

Job Portal Application | *Java, Spring Boot, Angular, PostgreSQL, Git*

Sep 2023 – Dec 2023

- Developed a job portal application with features for applicants (account creation, job application, job listing views) and admins (job management, application review).
- Implemented key functionalities, including account management, job application processes, and admin controls for efficient job adjustments and review.

CERTIFICATION

AWS Certified Cloud Practitioner
Introduction to Cloud Identity
Oracle Cloud Infrastructure 2025 Certified Developer Professional
Oracle Cloud Infrastructure 2025 Certified Data Science Professional

TECHNICAL SKILLS

Languages: Java, Python, SQL (Postgres), JavaScript, HTML/CSS, Azure, AWS
Frameworks: Angular, React, Node.js, Selenium, Spring Boot, JDBC
Developer Tools: Git, Docker, VS Code, PyCharm, IntelliJ
